Port Harcourt, Nigeria

Results-driven DevOps Engineer with over 4 years of experience in designing, automating, and optimizing scalable cloud infrastructure and CI/CD pipelines on AWS and Azure. Expert in Infrastructure as Code (Terraform, CloudFormation), containerization (Docker, Kubernetes), and full-stack monitoring (Prometheus, Grafana). Proven ability to enhance system reliability to 99.9%, reduce deployment times by up to 40%, and decrease operational costs through automation. Seeking to leverage skills in a challenging role to drive efficient and resilient software delivery.

EXPERIENCE

JUNIOR DEVOPS ENGINEER

Theltern, Lagos, Nigeria

June 2024 - January 2025

- Architected and deployed AWS infrastructure using Terraform (IaC), ensuring scalability, high availability, security, and cost optimization across multiple environments.
- Automated provisioning and configuration management of cloud resources with Terraform and CI/CD pipelines, reducing manual effort and cutting operational costs by 20%.
- Designed and implemented secure VPC architectures, including subnets, route tables, NAT gateways, and security groups, to enhance network security, compliance, and reliability.
- Configured end-to-end monitoring and alerting with Prometheus, Grafana, and AWS CloudWatch, improving incident detection and response times by 35% while ensuring system reliability.

DEVOPS ENGINEERING INTERN

Liontech, Remote, Nigeria.

September 2022 - March 2024

- Developed and automated CI/CD pipelines using Git, GitHub Actions, and Jenkins, streamlining release processes and reducing deployment time by 30%.
- Integrated Kubernetes into deployment workflows to enable scalable, resilient container orchestration and improve application availability.
- Automated provisioning and configuration management with Ansible, eliminating repetitive tasks, reducing human error, and accelerating environment setup.
- Implemented Infrastructure as Code (IaC) with Terraform, standardizing multi-environment deployments and ensuring consistency, security, and compliance across cloud infrastructure.

EDUCATION

B.Tech. ELECTRICAL ENGINEERING

Rivers state University, 2016 - 2021

WEST AFRICAN SENIOR SECONDARY SCHOOL CERTIFICATE

Victor International Secondary School, 2007 - 2012

SKILLS

- Cloud Platforms: AWS (EC2, S3, RDS, IAM, VPC, ALB, ECS, EKS, ASG, Route 53, Lambda, CloudWatch), Azure DevOps
- Infrastructure as Code (IaC): Terraform, AWS CloudFormation
- Containerization & Orchestration: Docker, Kubernetes, Helm, Amazon EKS
- CI/CD & Automation: Azure DevOps (Pipelines, Repos), Jenkins, GitHub Actions, ArgoCD, SonarQube
- Monitoring & Logging: Prometheus, Grafana, AWS CloudWatch, Kibana, Alerting
- Networking & Security: VPC Design, Security Groups, NACLs, IAM Policies, SSL/TLS
- Scripting & Programming: Bash/Shell, Python, Groovy, YAML
- Configuration Management: Ansible
- Soft Skills: Problem-solving, Collaboration, Documentation, Continuous Learning

PORTFOLIO & PROJECTS

- Live Portfolio: <https://patrickmbaza.github.io/> - Demonstrating DevOps projects, technical blog, and implementation details
- GitHub: <https://github.com/Patrickmbaza> - Featuring 20+ repositories including:
 - Kubernetes cluster management with Terraform
 - CI/CD pipelines with Jenkins and Azure DevOps
 - 3-tier application deployments
 - Infrastructure automation scripts
