Port Harcourt, Nigeria

DevOps Engineer with 4+ years of experience in cloud infrastructure, automation, and CI/CD, specializing in deploying AI/ML-powered SaaS applications. Experienced in container orchestration, serverless computing, and Infrastructure as Code (IaC), enabling scalable, secure, and highly available deployments. Skilled in integrating AI models into web applications and SaaS platforms, with a track record of improving reliability, reducing deployment times, and optimizing cloud costs.

EXPERIENCE

JUNIOR DEVOPS ENGINEER

Theltern, Lagos, Nigeria

June 2024 - January 2025

- Architected and deployed AWS infrastructure using Terraform (IaC), ensuring scalability, high availability, security, and cost optimization across multiple environments.
- Automated provisioning and configuration management of cloud resources with Terraform and CI/CD pipelines, reducing manual effort and cutting operational costs by 20%.
- Designed and implemented secure VPC architectures, including subnets, route tables, NAT gateways, and security groups, to enhance network security, compliance, and reliability.
- Configured end-to-end monitoring and alerting with Prometheus, Grafana, and AWS CloudWatch, improving incident detection and response times by 35% while ensuring system reliability.

DEVOPS ENGINEERING INTERN

Liontech,Remote, Nigeria.

September 2022 - March 2024

- Developed and automated CI/CD pipelines using Git, GitHub Actions, and Jenkins, streamlining release processes and reducing deployment time by 30%.
- Integrated Kubernetes into deployment workflows to enable scalable, resilient container orchestration and improve application availability.
- Automated provisioning and configuration management with Ansible, eliminating repetitive tasks, reducing human error, and accelerating environment setup.
- Implemented Infrastructure as Code (IaC) with Terraform, standardizing multi-environment deployments and ensuring consistency, security, and compliance across cloud infrastructure.

EDUCATION

B.Tech. ELECTRICAL ENGINEERING

Rivers state Univer sity, 2016 - 2021

WEST AFRICAN SENIOR SECONDARY SCHOOL CERTIFICATE

Victor International Secondary School, 2007 - 2012

SKILLS

- Cloud and Serverless Platforms: AWS (EC2, S3, RDS, IAM, VPC, ALB, ECS, EKS, ASG, Route 53, Lambda, CloudWatch), Azure DevOps
- Infrastructure as Code (IaC): Terraform, AWS CloudFormation
- Containerization & Orchestration: Docker, Kubernetes, Helm, Amazon EKS
- CI/CD & Automation: Azure DevOps (Pipelines, Repos), Jenkins, GitHub Actions, ArgoCD, SonarQube
- AI/ML Integration: Python ML frameworks, API-based ML services, AI model deployment and monitoring
- Monitoring & Logging: Prometheus, Grafana, AWS CloudWatch, Kibana, Alerting
- Networking & Security: VPC Design, Security Groups, NACLs, IAM Policies, SSL/TLS
- Scripting & Programming: Bash/Shell, Python, Groovy, YAML
- Configuration Management: Ansible
- Soft Skills: Problem-solving, Collaboration, Documentation, Continuous Learning

PORTFOLIO & PROJECTS

- Live Portfolio: <https://patrickmbaza.github.io/> - Demonstrating DevOps projects, technical blog, and implementation details

- GitHub: <https://github.com/Patrickmbaza> - Featuring 20+ repositories including:

DevOps & Cloud Infrastructure

- Kubernetes cluster management with Terraform
- CI/CD pipelines with Jenkins, GitHub Actions, and Azure DevOps
- 3-tier application deployments on AWS
- Infrastructure automation scripts using Terraform, Ansible, and Bash

AI & AI-Powered SaaS Applications

- AI SaaS platform for delivering machine learning services via APIs
- AI-augmented web applications with real-time predictions
- AI-driven consultation SaaS application integrating intelligent automation
- AI-assisted cybersecurity analysis and anomaly detection system
